

AUTOMOTIVE ABRASIVE

MANUAL FINISHING

Corazzi Fibre is a leading company in the production of non woven abrasive web. It operates in more than 70 countries around the world, with 25% of its current turnover from the Italian market and 75% from international markets. Together with an excellent logistic service, the company offers production flexibility and high customisation capacity on semi-finished and finished products.

MANUAL FINISHING

ABRASIVE SOLUTIONS FOR AUTOMOTIVE REFINISHING

Corazzi offers a complete range of sanding solutions for the automotive aftermarket. Its product range represents an important support for key applications, such as surface preparation before primer and paint, filler sanding, cleaning and finishing.

CONSTRUCTION

Synthetic aluminium oxide, artificial corundum, phenolic resin, non woven.

CHARACTERISTICS

Open web enables wet sanding and avoids loading effect. Tridimensional structure guarantees the best performance in cutting and lasting. High flexibility lets the operator reach hardly reachable areas in the car body and work on rounded surfaces.
